
THIS IS A WIDGET, NOT AN APP!!!

The icon in the application drawer will only launch a tutorial on how to add a widget.
Long press on home to add and configure the widget on your Homescreen...

Add your favourite photos on your Android phone Home!

Choose a single photo, scan your sdcard or a folder, search google or link to your Picasa albums for contents.

This widget offers 6 different sizes to bring your best pictures on your home, offering several features like recursive scan, borders, option to randomize the order, timed slideshow!

[Download](#) the full version from [AppBrain](#) , or get the [free version](#) for a preview!

Please report any issue to think.java.droid@gmail.com .

Free version is limited to 10 pictures per widget, randomly chosen from the sd-card or the specified folder.

Google image search function and Picasa integration are only available in the full version.
